CHAPTER 1. ADMISSIBILITY OF SCIENTIFIC EVIDENCE

I. INTRODUCTION
§ 1:1 Generally

II. THE GENERAL ACCEPTANCE STANDARD OF FRYE
§ 1:2 Before Frye
§ 1:3 The Frye extension
§ 1:4 Frye’s ascendance
§ 1:5 Applying Frye
§ 1:6 The decline of Frye

III. THE FEDERAL RULES OF EVIDENCE AND THE VALIDITY TEST OF DAUBERT
§ 1:7 Introduction
§ 1:8 Applying Daubert: Preliminary considerations regarding the management of expert testimony
§ 1:9 —The burden of proof regarding admissibility
§ 1:10 —Admissibility of expert testimony in bench trials
§ 1:11 The requirement of relevancy
§ 1:12 The qualifications test
§ 1:13 —Necessary qualifications
§ 1:14 —Specificity of the necessary qualifications
§ 1:15 Applying Daubert: The standards for determining validity
§ 1:16 —Testability (falsifiability)
§ 1:17 ——Evaluating empirical tests of falsifiability
§ 1:18 ——What, exactly, must be tested?—The methodology-conclusion paradox
§ 1:19 ———The challenges of reasoning from group data to individual decisions (G2i)
§ 1:20 —Error rate
§ 1:21 ——Error rates in stating features of an individual
§ 1:22 ——Error rates attributable to the research methods
used in studying population features
§ 1:23 —Peer review and publication
§ 1:24 —General acceptance
§ 1:25 Applying Daubert: “Technical, or other specialized knowledge”: Kumho Tire, Ltd. v. Carmichael
§ 1:26 —When must a fact be a matter of scientific inquiry?
§ 1:27 ——Police officer experts and other specialists by experience
§ 1:28 —— ——The “same intellectual rigor that characterizes . . . the relevant field” test
§ 1:29 —— ——The parameters of “science”
§ 1:30 —— ——Is forensic science science?
§ 1:31 —— ——Is social science science?
§ 1:32 Rule 701
§ 1:33 Rule 703
§ 1:34 Daubert and appellate review
§ 1:35 Applying Daubert: Criminal cases
§ 1:36 Expert testimony and Rule 403
§ 1:37 Court-appointed experts
§ 1:38 —Rule 706 experts
§ 1:39 —Technical advisors appointed under the inherent authority of the court
§ 1:40 Conclusion

CHAPTER 2. ETHICAL STANDARDS OF AND CONCERNING EXPERT WITNESSES

I. INTRODUCTION
§ 2:1 Generally
§ 2:2 Varities of expertise

II. DEFINING ETHICAL TESTIMONY OF EXPERT WITNESSES: THE “SAME INTELLECTUAL RIGOR” TEST
§ 2:3 Generally
§ 2:4 Critiques of the same intellectual rigor test—The test is too lenient

1. THE TEST IS TOO STRINGENT
§ 2:5 Critiques of the same intellectual rigor test—The test is too stringent
§ 2:6 —Summary

III. THE ROLE OF THE EXPERT WITNESS
§ 2:7 Introduction: three idealized role models
 IV. ENFORCING AND ENCOURAGING ETHICAL STANDARDS

§ 2:10 Generally
§ 2:11 Enforcing ethical standards—Sanctions by the parties to the litigation
§ 2:12 —The sponsoring lawyer’s duty to police experts
§ 2:13 —Opposing lawyer control
§ 2:14 —Sanctions by professional organizations
§ 2:15 —Sanctions by Judges
§ 2:16 Encouraging ethical standards—Professional codes of ethics
§ 2:17 —Court codes of ethics
§ 2:18 —Less adversarial procedures
§ 2:19 —Summary

 V. THE WORKING RELATIONSHIP OF LAWYERS AND EXPERTS

§ 2:20 Finding and establishing a relationship with the expert
§ 2:21 Discovery
§ 2:22 —The work-product doctrine and discovery from experts
§ 2:23 ——Testifying expert witnesses
§ 2:24 ——Non-witness experts
§ 2:25 —Tactics for shielding information in possession of experts
§ 2:26 —Discovery under the rules of criminal procedure

 VI. CONCLUDING COMMENTS

§ 2:27 Generally

CHAPTER 3. TRIAL FACTFINDERS AND EXPERT EVIDENCE

I. INTRODUCTION

§ 3:1 Generally

II. JURY COMPOSITION AND SELECTION

§ 3:2 Generally
§ 3:3 Judges versus jurors
§ 3:4 Jury selection: summoning citizens from the community
§ 3:5 One-day/one-trial jury system
§ 3:6 Special juries
§ 3:7 Jury de-selection: voir dire
§ 3:8 Implications

III. HOW JURIES DECIDE
§ 3:9 Generally
§ 3:10 Meter reading
§ 3:11 Story telling
§ 3:12 Story and meter models combined
§ 3:13 Central and peripheral processing
§ 3:14 Jury decision-making as a group process

IV. HOW LAYPERSONS RESPOND TO EXPERTS
§ 3:15 Generally
§ 3:16 Coherence and correspondence
§ 3:17 The jury and complex cases—Case complexity
§ 3:18 Statistical and probability evidence
§ 3:19 Other scientific and technological expert evidence
§ 3:20 Reactions to experts
§ 3:21 Over-belief in experts
§ 3:22 Jurors’ ability to assess expert testimony (Central v. Peripheral Processing)
§ 3:23 The impact of different types of experts
§ 3:24 The effect of opposing experts and cross-examination on the factfinder’s acceptance of expert testimony
§ 3:25 Summary

V. EFFECTS OF TRIAL ORGANIZATION AND PROCEDURES
§ 3:26 Generally
§ 3:27 Structuring the trial
§ 3:28 Bifurcation and similar segmentation
§ 3:29 Severance and joinder
§ 3:30 Reorganizing the order of trial elements
§ 3:31 Expert testimony
§ 3:32 Instructions
§ 3:33 Court-appointed experts
§ 3:34 Improving the jurors’ learning environment

CHAPTER 4. SCIENTIFIC METHOD: THE LOGIC OF DRAWING INFERENCES FROM
EMPIRICAL EVIDENCE

I. INTRODUCTION

§ 4:1 Generally
§ 4:2 How science finds answers
§ 4:3 The nature of empirical questions
§ 4:4 Empirical questions and normative questions
§ 4:5 Purposes of research
§ 4:6 Settings for research

II. DEFINING AND MEASURING THINGS

§ 4:7 Generally
§ 4:8 Conceptual and operational definitions
§ 4:9 Scales of measurement
§ 4:10 Reliability and validity
§ 4:11 Roles variables play
§ 4:12 Statistical aspects

III. SAMPLING

§ 4:13 Generally
§ 4:14 Units of analysis
§ 4:15 Types of sampling
§ 4:16 Selection bias
§ 4:17 Statistical aspects—Sample size
§ 4:18 —Confidence limits

IV. RELATIONSHIPS AMONG VARIABLES

§ 4:19 Generally
§ 4:20 Minimum conditions for inferring a relationship
§ 4:21 —Single cell missing data pattern
§ 4:22 —Single row (or column) missing data pattern
§ 4:23 —Main diagonal missing data pattern
§ 4:24 Predictive relationships
§ 4:25 —Statistical aspects
§ 4:26 Causal relationships
§ 4:27 —Squeezing causation from correlational data
§ 4:28 —Threats to internal validity
§ 4:29 — —History
§ 4:30 — —Maturation
§ 4:31 — —Testing
§ 4:32 — —Instrumentation
§ 4:33 — —Statistical regression
§ 4:34 — —Selection
§ 4:35 — —Experimental mortality
§ 4.36 — —Selection-maturation interaction, etc
§ 4.37 — —Chance
§ 4.38 — —Distortions in independent and dependent variables

V. THREATS TO EXTERNAL VALIDITY
§ 4.39 Generally

VI. RESEARCH DESIGNS
§ 4.40 Generally
§ 4.41 Pre-experimental designs
§ 4.42 True experiments
§ 4.43 Quasi-experiments
§ 4.44 Statistical aspects

VII. CONCLUSION
§ 4.45 Generally

CHAPTER 5. STATISTICAL PROOF
I. LEGAL ISSUES
§ 5.1 Introduction
§ 5.2 Admissibility and weight of statistical studies
§ 5.3 Varieties and limits of statistical expertise
§ 5.4 Procedures that enhance statistical testimony—Maintaining professional autonomy
§ 5.5 ——Disclosing other analyses
§ 5.6 ——Disclosing data and analytical methods before trial
§ 5.7 ——Presenting expert statistical testimony

II. SCIENTIFIC STATUS
§ 5.8 Introduction
§ 5.9 Data collection—Types of studies
§ 5.10 ——Randomized controlled experiments
§ 5.11 ——Observational studies
§ 5.12 ——Generalizing and extrapolating
§ 5.13 ——Descriptive censuses and surveys
§ 5.14 ——What method is used to select the units?
§ 5.15 ——Of the units selected, which are measured?
§ 5.16 ——Some uses of random sampling in proving disputed facts
§ 5.17 ——Individual measurements—Reliability
§ 5.18 ——Validity
§ 5.19 ——Compilation
§ 5:20 Data presentation
§ 5:21 — Are rates or percentages properly interpreted? — Have appropriate benchmarks been used?
§ 5:22 — — Have the data-collection procedures changed?
§ 5:23 — — Are the categories appropriate?
§ 5:24 — — How big is the base of a percentage?
§ 5:25 — — What comparisons are made?
§ 5:26 — Is an appropriate measure of association used?
§ 5:27 — Does a graph portray data fairly?
§ 5:28 — — How are trends displayed?
§ 5:29 — — How are distributions displayed?
§ 5:30 — Is an appropriate measure used for the center of a distribution?
§ 5:31 — Is an appropriate measure of variability used?
§ 5:32 Statistical inference — Generally
§ 5:33 — Estimation — What estimator should be used?
§ 5:34 — — What is the standard error? The confidence interval?
§ 5:35 — Significance levels and hypothesis tests — What is the p-value?
§ 5:36 — — Is a difference statistically significant?
§ 5:37 — Evaluating hypothesis tests — What is the power of the test?
§ 5:38 — — One- or two-tailed tests?
§ 5:39 — — How many tests have been performed?
§ 5:40 — — Tests or interval estimates?
§ 5:41 — — What are the rival hypotheses?
§ 5:42 — — Posterior probabilities
§ 5:43 Correlation and regression — Generally
§ 5:44 — Scatter diagrams
§ 5:45 — Correlation coefficients
§ 5:46 — — Is the association linear?
§ 5:47 — — Do outliers influence the correlation coefficient?
§ 5:48 — — Does a confounding variable influence the coefficient?
§ 5:49 — Regression lines
§ 5:50 — — What are the slope and intercept?
§ 5:51 — — What is the unit of analysis?
§ 5:52 Statistical models
§ 5:53 — A social science example
§ 5:54 — Standard errors, t-statistics, and statistical significance
§ 5:55 — Summary

Appendix 5A. Probability and Statistical Inference
Appendix 5B. Glossary of Terms

Bibliography
CHAPTER 6. MULTIPLE REGRESSION

I. INTRODUCTION
§ 6:1 Generally

II. RESEARCH DESIGN: MODEL SPECIFICATION
§ 6:2 Generally
§ 6:3 What is the specific question that is under investigation?
§ 6:4 What model should be used to evaluate the question?
§ 6:5 —Choosing the dependent variable
§ 6:6 —Choosing the explanatory variable that is relevant
§ 6:7 —Choosing the additional explanatory variables
§ 6:8 —Choosing the functional form of the multiple regression model
§ 6:9 —Choosing multiple regression as a method of analysis

III. INTERPRETING MULTIPLE REGRESSION RESULTS
§ 6:10 Generally
§ 6:11 Practical and statistical significance
§ 6:12 —When should statistical tests be used?
§ 6:13 —What is the appropriate level of statistical significance?
§ 6:14 —Should statistical tests be one-tailed or two-tailed?
§ 6:15 Are the regression results robust?
§ 6:16 —What evidence exists that the explanatory variable causes changes in the dependent variable?
§ 6:17 —To what extent are the explanatory variables correlated with each other?
§ 6:18 —To what extent are individual errors in the regression model independent?
§ 6:19 —To what extent are the regression results sensitive to individual data points?
§ 6:20 —To what extent are the data subject to measurement error?

IV. THE EXPERT
§ 6:21 Generally

V. PRESENTATION OF STATISTICAL EVIDENCE
§ 6:22 Generally
§ 6:23 What disagreements exist regarding data on which the analysis is based?
CHAPTER 7. SURVEY RESEARCH

I. THE LEGAL RELEVANCE OF SURVEY RESEARCH

§ 7:1 Generally
§ 7:2 Use of surveys in court
§ 7:3 Surveys used to help assess expert acceptance in the wake of Daubert
§ 7:4 Surveys used to help assess community standards: Atkins v. Virginia
§ 7:5 A comparison of survey evidence and individual testimony

II. PURPOSE AND DESIGN OF THE SURVEY

§ 7:6 Was the survey designed to address relevant questions?
§ 7:7 Was participation in the design, administration, and interpretation of the survey appropriately controlled to ensure the objectivity of the survey?
§ 7:8 Are the experts who designed, conducted, or analyzed the survey appropriately skilled and experienced?
§ 7:9 Are the experts who will testify about surveys conducted by others appropriately skilled and experienced?

III. POPULATION DEFINITION AND SAMPLING

§ 7:10 Was an appropriate universe or population identified?
§ 7:11 Did the sampling frame approximate the population?
§ 7:12 Does the sample approximate the relevant characteristics of the population?
§ 7:13 What is the evidence that nonresponse did not bias the results of the survey?
§ 7:14 What procedures were used to reduce the likelihood of a biased sample?
§ 7:15 What precautions were taken to ensure that only qualified respondents were included in the survey?

IV. SURVEY QUESTIONS AND STRUCTURE

§ 7:16 Were questions on the survey framed to be clear, precise, and unbiased?
§ 7:17 Were some respondents likely to have no opinion? If so, what steps were taken to reduce guessing?
§ 7:18 Did the survey use open-ended or closed-ended questions? How was the choice in each instance justified?

§ 7:19 If probes were used to clarify ambiguous or incomplete answers, what steps were taken to ensure that the probes were not leading and were administered in a consistent fashion?

§ 7:20 What approach was used to avoid or measure potential order or context effects?

§ 7:21 If the survey was designed to test a causal proposition, did the survey include an appropriate control group or question?

§ 7:22 What limitations are associated with the mode of data collection used in the survey?

§ 7:23 —In-person interviews
§ 7:24 —Telephone interviews
§ 7:25 —Mail questionnaires
§ 7:26 —Internet surveys

V. SURVEYS INVOLVING INTERVIEWERS

§ 7:27 Were the interviewers appropriately selected and trained?

§ 7:28 What did the interviewers know about the survey and its sponsorship?

§ 7:29 What procedures were used to ensure and determine that the survey was administered to minimize error and bias?

VI. DATA ENTRY AND GROUPING OF RESPONSES

§ 7:30 What was done to ensure that the data were recorded accurately?

§ 7:31 What was done to ensure that the grouped data were classified consistently and accurately?

VII. DISCLOSURE AND REPORTING

§ 7:32 When was information about the survey methodology and results disclosed?

§ 7:33 Does the survey report include complete and detailed information on all relevant characteristics?

§ 7:34 In surveys of individuals, what measures were taken to protect the identities of individual respondents?

Appendix 7A. Glossary of Terms

CHAPTER 8. INSANITY, DIMINISHED CAPACITY AND INCOMPETENCY IN CRIMINAL CASES

I. LEGAL ISSUES
§ 8:1 Introduction
§ 8:2 Legal tests of insanity—Rationale
§ 8:3 —The M’Naghten test
§ 8:4 —The Durham “product” test
§ 8:5 —The ALI test
§ 8:6 —The Guilty but mentally ill verdict
§ 8:7 Mens rea and mental disorder—“Diminished capacity”
§ 8:8 Abolition of the insanity defense
§ 8:9 Mental disorder and non-capital sentencing
§ 8:10 Mental disorder and capital sentencing
§ 8:11 Competence to proceed and represent oneself
§ 8:12 Competence to be executed
§ 8:13 Constitutional contours of the evaluation process—application of the Sixth and Fifth Amendments
§ 8:14 Conclusion

II. SCIENTIFIC STATUS
§ 8:15 Introduction
§ 8:16 Major psychoses—Introduction
§ 8:17 —Introductory discussion of the science: The scientific questions
§ 8:18 —Introductory discussion of the science—Scientific methods applied in the research
§ 8:19 —Areas of scientific agreement
§ 8:20 —Areas of scientific disagreement—Diagnostic criteria
§ 8:21 ——Nervous system etiological factors
§ 8:22 ——Etiological role of the environment
§ 8:23 ——Psychosis and violence
§ 8:24 Intellectual disability (formerly called mental retardation)—Introduction
§ 8:25 Intellectual disability—Introductory discussion of the science—The scientific questions
§ 8:26 ——Scientific methods applied in the research
§ 8:27 ——Areas of scientific agreement
§ 8:28 ——Areas of scientific disagreement
§ 8:29 Epilepsy—Introduction
§ 8:30 — Introductory discussion of the science—The scientific questions
§ 8:31 — — Scientific methods applied in the research
§ 8:32 — Areas of scientific agreement
§ 8:33 — Areas of scientific disagreement
§ 8:34 Posttraumatic stress disorder—Introduction
§ 8:35 — Introductory discussion of the science—The scientific questions—Questions studied
§ 8:36 — — — Questions not yet studied
§ 8:37 — — Scientific methods applied in the research
§ 8:38 — Areas of scientific agreement
§ 8:39 — Areas of scientific disagreement
§ 8:40 Dissociative identity disorder (formerly called Multiple Personality Disorder)—Introduction
§ 8:41 Dissociative identity disorder—Introductory discussion of the science—The scientific questions—Questions studied
§ 8:42 — — — Questions not yet studied
§ 8:43 — — Scientific methods applied in the research
§ 8:44 — Areas of scientific agreement
§ 8:45 — Areas of scientific disagreement
§ 8:46 Selected disorders: Pyromania, Kleptomania, and Gambling disorder (formerly Pathological Gambling)—Introduction
§ 8:47 Selected disorders: Pyromania, Kleptomania, and Gambling disorder—Introductory discussion of the science—The scientific questions—Questions studied
§ 8:48 Selected disorders: pyromania, kleptomania, and gambling disorder—Introductory discussion of the science—The scientific questions—Questions not yet studied
§ 8:49 — — Scientific methods applied in the research
§ 8:50 — Areas of scientific agreement
§ 8:51 — Areas of scientific disagreement

CHAPTER 9. CLINICAL AND ACTUARIAL PREDICTIONS OF VIOLENCE

I. LEGAL ISSUES
§ 9:1 Introduction
§ 9:2 Constitutional standards: admissibility
§ 9:3 Evidentiary standards: when applicable
§ 9:4 Evidentiary standards: qualifications
§ 9:5 Evidentiary admissibility: “fit”
§ 9:6 Evidentiary admissibility: validity and helpfulness

xxxii
II. SCIENTIFIC STATUS

§ 9:9 Introductory discussion of the science—History and development of the field
§ 9:10 —Operational definitions of violence risk assessment and types of risk factors for violence
§ 9:11 —Research approaches in violence risk assessment
§ 9:12 —Limitations inherent in research on violence risk assessment
§ 9:13 Areas of scientific agreement—The preferred methods of risk assessment
§ 9:14 —The difficulty of prediction in the field
§ 9:15 Areas of scientific disagreement—Whether prediction about individual recidivism is possible
§ 9:16 —Whether risk assessment exacerbates racial disparities in incarceration
§ 9:17 Future directions in violence risk assessment

CHAPTER 10. SEXUAL AGGRESSORS

I. LEGAL ISSUES

§ 10:1 Introduction
§ 10:2 Commitment statutes: State and Federal
§ 10:3 Constitutional issues surrounding commitment of “sexual predators”
§ 10:4 —Kansas v. Hendricks
§ 10:5 ——Substantive due process: The framework of Kansas v. Hendricks
§ 10:6 ——Substantive due process—The “lack of volitional control” test after Hendricks: Kansas v. Crane
§ 10:7 ———State practices
§ 10:8 ———Philosophical considerations regarding free will
§ 10:9 ——The double jeopardy and ex post facto clauses: On defining criminal proceedings and punishment
§ 10:10 ——The double jeopardy and ex post facto clauses—Double jeopardy
§ 10:11 ———The ex post facto clause
§ 10:12 ———Conditions of confinement
§ 10:13 ——Estimating “dangerousness”
§ 10:14 Constitutional issues surrounding commitment of “sexual predators”—The challenge to the Adam Walsh Act on the basis that it exceeded Congress’ authority

xxxiii
§ 10:15 Community registration and notification statutes
§ 10:16 —Introduction: The law’s particulars
§ 10:17 —Constitutional challenges
§ 10:18 —Constitutional issues based on claims that registration and notification laws punish
§ 10:19 —Privacy and procedural due process
§ 10:20 —Equal protection
§ 10:21 —The federal Sex Offender Registration and Notification Act (“SORNA”)
§ 10:22 Electronic monitoring laws
§ 10:23 Burdens of proof in predicting sexual predation
§ 10:24 Conclusion

II. SCIENTIFIC STATUS

§ 10:25 Introduction: Terminology
§ 10:26 The scientific questions—How well can recidivism among sexual aggressors be predicted?
§ 10:27 —Questions addressed by scientists versus information relevant to legal issues
§ 10:28 —The outcome measure
§ 10:29 —Instruments for the prediction of recidivism among sex offenders
§ 10:30 —Cautionary remarks about “expert” predictions
§ 10:31 —Does treatment, supervision, or community notification reduce the risk of recidivism among sex offenders?
§ 10:32 —Nonbehavioral psychotherapy
§ 10:33 —Pharmacological and surgical treatments
§ 10:34 —Cognitive-behavioral treatments
§ 10:35 —Do sexual aggressors have a mental disorder?
§ 10:36 Scientific methods applied to sexual aggression
§ 10:37 —Case studies
§ 10:38 —Clinical sample studies
§ 10:39 —Survey or epidemiological studies
§ 10:40 —Prediction studies
§ 10:41 —Treatment outcome studies
§ 10:42 —Phallometric studies
§ 10:43 —Conclusions
§ 10:44 Issues about which there is scientific consensus—The recidivism of sexual aggressors can be predicted
§ 10:45 —Actuarial methods out-perform clinical judgment
§ 10:46 —Sexual aggressors who voluntarily complete certain treatments have been shown to be of lower risk
§ 10:47 —Some interventions cause harm by producing an increase in recidivism
§ 10:48 —Sexual aggressors are sexually deviant
§ 10:49 Issues about which there is scientific controversy (or
TABLE OF CONTENTS

ignorance)—How exactly should risk appraisals be conducted?
§ 10:50 —Do any treatments have specific effects in reducing recidivism?
§ 10:51 —What proportion of sexual aggressors are sexually deviant?
§ 10:52 New research directions on sexual aggressors—Prediction of recidivism
§ 10:53 —Treatment and management
§ 10:54 —The causal role of other psychological constructs
§ 10:55 —Ontogeny and etiology
§ 10:56 —Screening potential sex offenders

CHAPTER 11. PROJECTIVE TECHNIQUES

I. LEGAL ISSUES
§ 11:1 Introduction
§ 11:2 Psychological uses
§ 11:3 Legal uses
§ 11:4 Failure to critically assess clinical testimony based on projective techniques

II. SCIENTIFIC STATUS
§ 11:5 Introductory discussion of the science
§ 11:6 A primer of projective techniques
§ 11:7 The scientific questions
§ 11:8 The scientific methods applied in research
§ 11:9 Areas of scientific agreement
§ 11:10 Impression management
§ 11:11 Interrater reliability and accuracy of scores
§ 11:12 Overperception of psychopathology
§ 11:13 Diagnosis
§ 11:14 Detection of child sexual abuse
§ 11:15 Multicultural clinical assessment
§ 11:16 Availability of data and manuscripts
§ 11:17 Future directions

CHAPTER 12. THE BATTERED WOMAN SYNDROME AND OTHER PSYCHOLOGICAL EFFECTS OF DOMESTIC VIOLENCE AGAINST WOMEN

I. LEGAL ISSUES
§ 12:1 Generally
§ 12:2 Self-defense—Legal theory
§ 12:3 —The theory of the battered woman syndrome
§ 12:4 — —The cycle theory
§ 12:5 — —Learned helplessness
§ 12:6 — Judicial responses to the battered woman syndrome in self-defense cases
§ 12:7 — —Legal issues surrounding the battered woman syndrome
§ 12:8 — — —Failure to leave the abusive relationship
§ 12:9 — — —Inminent harm
§ 12:10 — — — —Incongruence between battered women cases and traditional notions of self-defense
§ 12:11 — — — —Honesty of belief in need to use deadly force
§ 12:12 — — — —Reasonableness of belief in need to use deadly force
§ 12:13 — — —Use of the battered woman syndrome to provide context or a “social framework”
§ 12:14 — — —Justification or excuse?
§ 12:15 — Judicial responses to the battered woman syndrome in other criminal contexts—The defense of duress
§ 12:16 — —Miscellaneous defenses
§ 12:17 Prosecutorial use of the battered woman syndrome
§ 12:18 Constitutional issues raised in battered women cases
§ 12:19 — —Due process and effective counsel
§ 12:20 — —Equal protection
§ 12:21 Civil cases
§ 12:22 Conclusion

II. SCIENTIFIC STATUS

§ 12:23 Introductory discussion of the science—The general questions
§ 12:24 — —The scope of the problem
§ 12:25 — —Dynamics of abusive relationships
§ 12:26 — —Battered woman syndrome and psychological sequelae
§ 12:27 — —The scientific methods applied in the research
§ 12:28 Areas of scientific agreement and disagreement
§ 12:29 Future directions

CHAPTER 13. THE BATTERED CHILD SYNDROME AND OTHER PSYCHOLOGICAL EFFECTS OF SEXUAL AND PHYSICAL ABUSE OF CHILDREN

I. LEGAL ISSUES

xxxvi
TABLE OF CONTENTS

§ 13:1 Introduction
§ 13:2 The battered child syndrome: The medical model
§ 13:3 The battered child syndrome: The psychological model
§ 13:4 Conclusion

II. SCIENTIFIC STATUS

§ 13:5 Introductory discussion of the science—The general questions
§ 13:6 ——Parricide
§ 13:7 Introductory discussion of the science—The general questions—Impact of physical abuse on the child
§ 13:8 Impact of physical abuse on the child—Post-traumatic stress disorder
§ 13:9 ——Hypervigilance
§ 13:10 ——Learned helplessness and depression
§ 13:11 The scientific methods applied in the research
§ 13:12 Areas of scientific agreement and disagreement
§ 13:13 Future directions

CHAPTER 14. RAPE TRAUMA SYNDROME

I. LEGAL ISSUES

§ 14:1 Introduction
§ 14:2 Relevance of RTS
§ 14:3 RTS testimony—Qualifications
§ 14:4 Scientific reliability/validity and general acceptance of RTS
§ 14:5 The potential for unfair prejudice
§ 14:6 Defense use of RTS
§ 14:7 Conclusion

II. SCIENTIFIC STATUS

§ 14:8 Introduction
§ 14:9 ——Scientific vs. legal questions
§ 14:10 ——Methodological issues
§ 14:11 Review of the scientific research on rape trauma
§ 14:12 ——Post-traumatic stress disorder
§ 14:13 ——Studies using comparison groups
§ 14:14 ——Studies with no comparison groups
§ 14:15 ——Summary
§ 14:16 ——Depression
§ 14:17 ——Studies using comparison groups
§ 14:18 ——Studies with no comparison groups
§ 14:19 ——Summary
§ 14:20 ——Fear
CHAPTER 15. EYEWITNESS IDENTIFICATIONS

I. LEGAL ISSUES

§ 15:1 Introduction
§ 15:2 Relevance or fit
§ 15:3 Reliability/validity of the science
§ 15:4 Assisting the trier of fact
§ 15:5 Rule 403: Weighing probative value and unfair prejudice
§ 15:6 Constitutional challenges to eyewitness identifications
§ 15:7 Jury instructions
§ 15:8 Standards of appellate review
§ 15:9 The right to expert witnesses
§ 15:10 Conclusion

II. SCIENTIFIC STATUS

§ 15:11 Introductory discussion of the science

xxxviii
CHAPTER 16. CHILDREN’S MEMORY AND TESTIMONY

I. LEGAL ISSUES

§ 16:1 Introduction
§ 16:2 Out-of-court statements of child witnesses—Introductory background: Hearsay and the confrontation clause
§ 16:3 —The Confrontation Clause
§ 16:4 —Hearsay exceptions for child statements in abuse cases
II. SCIENTIFIC STATUS

§ 16:12 Introduction
§ 16:13 Suggestibility of child witnesses
§ 16:14 —Defining suggestibility
§ 16:15 —The constructive nature of memory
§ 16:16 —Boundaries of suggestibility? Salient events, actions, and children's bodies
§ 16:17 Child witness interviews and suggestibility
§ 16:18 —Repeated interviews
§ 16:19 —Stereotype induction
§ 16:20 —Influence of interviewer status on suggestibility
§ 16:21 —Interviewer bias
§ 16:22 —Peer pressure and peer interaction
§ 16:23 —Emotional tone and reinforcement of the child's behavior and responses
§ 16:24 —Type of questioning technique
§ 16:25 —Visualization and sociodramatic play
§ 16:26 Additional issues in children's memory and testimony
§ 16:27 —Dolls and props

§ 16:38 —Children's lying and truth-telling
§ 16:39 Future directions and conclusions

CHAPTER 17. GENDER STEREOTYPING
I. LEGAL ISSUES

§ 17:1 Introduction
§ 17:2 The statutory background
§ 17:3 —Same-sex discrimination
§ 17:4 —Defining “because of . . . sex” under Title VII
§ 17:5 — —Transgender individuals
§ 17:6 — —Sexual orientation
§ 17:7 Proving gender stereotyping
§ 17:8 The relevance or “fit” of research on gender stereotyping

II. SCIENTIFIC STATUS

A. INTRODUCTION

§ 17:9 Introductory discussion of the science
§ 17:10 Basic concepts and definitions
§ 17:11 History and development of the field
§ 17:12 Scientific questions about gender stereotyping

B. METHODOLOGICAL ISSUES

§ 17:13 Overview
§ 17:14 Scientific nature
§ 17:15 Traditional research methodologies
§ 17:16 Implicit measures
§ 17:17 Meta-analysis
§ 17:18 Criticisms of these research paradigms

C. OVERVIEW OF THE SCIENCE

1. Stereotype Content

§ 17:19 Introduction
§ 17:20 Stereotypes of subtypes and subgroups
§ 17:21 Ambivalent gender stereotypes
§ 17:22 The relation between gender stereotypes and stereotypes of managers and leaders
§ 17:23 Origins of stereotype content

2. Stereotype Application

§ 17:24 Categorization and information processing
§ 17:25 Role and behavioral incongruity
§ 17:26 Gender stereotypes and attribution
§ 17:27 Gender stereotypes and evaluation
§ 17:28 Gender stereotypes and employment decisions
§ 17:29 Overall conclusions about the effects of gender stereotypes on judgments
§ 17:30 Automatic activation of gender stereotypes
§ 17:31 Variability in stereotype activation

3. Stereotype Inhibition and Control

§ 17:32 Overview
§ 17:33 Naturalistic factors
§ 17:34 — Individuating information
§ 17:35 — Perceiver motivation
§ 17:36 — Feelings of threat
§ 17:37 — Power
§ 17:38 Organizational factors
§ 17:39 — Cognitive resources
§ 17:40 — Social norms
§ 17:41 — Accountability
§ 17:42 — Decision criteria
§ 17:43 — Instructions to suppress stereotypes
§ 17:44 — Other interventions
§ 17:45 — Counter-stereotypical role models

D. AREAS OF SCIENTIFIC AGREEMENT AND DISAGREEMENT

§ 17:46 Overview
§ 17:47 Areas of agreement
§ 17:48 Areas of disagreement
§ 17:49 Future directions

CHAPTER 18. HYPNOSIS

I. LEGAL ISSUES

§ 18:1 Introduction
§ 18:2 By what rule should hypnosis be evaluated?
§ 18:3 Admissibility of hypnotically refreshed testimony—Per se admissible
§ 18:4 — Totality of the circumstances
§ 18:5 — Admissible with safeguards
§ 18:6 — Per se inadmissible, but with two caveats
§ 18:7 Conclusion

II. SCIENTIFIC STATUS

§ 18:8 Introductory discussion of the science
§ 18:9 — What is hypnosis?
§ 18:10 — When is a person hypnotized?
§ 18:11 — The research foundation in hypnosis
§ 18:12 — The scientific questions
§ 18:13 — — Personality and hypnosis
§ 18:14 — — The effects of hypnosis on behavior, physiology,
and experience
§ 18:15 — —Memory, responsibility, and certainty
§ 18:16 — —Clinical efficacy
§ 18:17 —The scientific methods applied in the research
§ 18:18 — —Scientifically reliable and valid measurement of hypnotic response
§ 18:19 — —The simulation (faking) of hypnosis
§ 18:20 — —Research design and methodology
§ 18:21 Areas of scientific agreement
§ 18:22 —Principles relating hypnosis to personality—Hypnotic responsiveness is stable
§ 18:23 — —Hypnotic responsiveness depends more on the efforts and abilities of the subject than on the skill of the person administering hypnosis
§ 18:24 — —The ability to experience hypnosis is not meaningfully related to personality
§ 18:25 — —Hypnosis and its effect on behavior, physiology, and experience
§ 18:26 — —When neurological activity is monitored, administration of a hypnotic induction alone is associated with no unique or discernable alteration in brain functioning
§ 18:27 — —Hypnotic subjects typically report effortless nonvolitional experience but in fact remain active participants
§ 18:28 — —Hypnosis does not enable subjects to transcend volitional capacity
§ 18:29 — —Memory, responsibility, and certainty—Hypnotizing a subject does not increase accuracy of memory
§ 18:30 — —Hypnotized subjects are able to control their behavior
§ 18:31 — —Clinical efficacy—When used properly, hypnosis is an effective intervention with some medically and psychologically disordered patients
§ 18:32 — —The risk for negative side effects associated with hypnotic treatment appears comparable to that associated with other forms of psychological intervention
§ 18:33 Areas of scientific disagreement—Principles relating hypnosis to personality—Does the stability of hypnotic responsiveness reflect primarily a stable personality trait or does it reflect primarily stability of the testing context?
§ 18:34 — —Are personality, social, and cognitive factors implicated in hypnotic responsiveness best understood in additive terms or do their respective weights depend on the person's level of hypnotic responsiveness?
§ 18:35 — —The effects of hypnosis on behavior, physiology, and experience

Table of Contents

and experience
§ 18:15 — —Memory, responsibility, and certainty
§ 18:16 — —Clinical efficacy
§ 18:17 —The scientific methods applied in the research
§ 18:18 — —Scientifically reliable and valid measurement of hypnotic response
§ 18:19 — —The simulation (faking) of hypnosis
§ 18:20 — —Research design and methodology
§ 18:21 Areas of scientific agreement
§ 18:22 —Principles relating hypnosis to personality—Hypnotic responsiveness is stable
§ 18:23 — —Hypnotic responsiveness depends more on the efforts and abilities of the subject than on the skill of the person administering hypnosis
§ 18:24 — —The ability to experience hypnosis is not meaningfully related to personality
§ 18:25 — —Hypnosis and its effect on behavior, physiology, and experience
§ 18:26 — —When neurological activity is monitored, administration of a hypnotic induction alone is associated with no unique or discernable alteration in brain functioning
§ 18:27 — —Hypnotic subjects typically report effortless nonvolitional experience but in fact remain active participants
§ 18:28 — —Hypnosis does not enable subjects to transcend volitional capacity
§ 18:29 — —Memory, responsibility, and certainty—Hypnotizing a subject does not increase accuracy of memory
§ 18:30 — —Hypnotized subjects are able to control their behavior
§ 18:31 — —Clinical efficacy—When used properly, hypnosis is an effective intervention with some medically and psychologically disordered patients
§ 18:32 — —The risk for negative side effects associated with hypnotic treatment appears comparable to that associated with other forms of psychological intervention
§ 18:33 Areas of scientific disagreement—Principles relating hypnosis to personality—Does the stability of hypnotic responsiveness reflect primarily a stable personality trait or does it reflect primarily stability of the testing context?
§ 18:34 — —Are personality, social, and cognitive factors implicated in hypnotic responsiveness best understood in additive terms or do their respective weights depend on the person's level of hypnotic responsiveness?
§ 18:35 — —The effects of hypnosis on behavior, physiology, and experience
experience—To what extent do increases in hypnotic responsiveness induced by laboratory procedures reflect temporary behavioral compliance as opposed to more enduring changes in level of responsiveness?

§ 18:36 — Do behaviors and reports of subjective experience that phenotypically resemble those found in hypnosis, but which were not preceded by a hypnotic induction, reflect hypnotic or nonhypnotic processes?

§ 18:37 — Is there a causal link between early trauma, dissociative pathology, and high hypnotizability?

§ 18:38 Future directions
§ 18:39 — Hypnosis and the brain
§ 18:40 — Hypnosis and cognition
§ 18:41 — Dissecting hypnotic response
§ 18:42 — Hypnosis and clinical outcome
§ 18:43 — Hypnosis, trauma, and dissociation
§ 18:44 — Hypnosis and the immune system

CHAPTER 19. REPRESSED MEMORIES

I. LEGAL ISSUES
§ 19:1 Introduction
§ 19:2 Tolling the statute of limitations
§ 19:3 Evidentiary issues
§ 19:4 — State case law
§ 19:5 — Federal case law
§ 19:6 Civil suits brought by the alleged abusers against therapists
§ 19:7 Conclusion

II. SCIENTIFIC STATUS
§ 19:8 Introductory discussion of the science
§ 19:9 Areas of scientific agreement
§ 19:10 — Forgetfulness
§ 19:11 — Amnesia due to biological causes
§ 19:12 — Amnesia due to incomplete encoding
§ 19:13 — Global amnesia
§ 19:14 — Feigned amnesia
§ 19:15 — Nondisclosure
§ 19:16 Terms widely used in the scientific literature
§ 19:17 Scientifically accepted research on mechanisms of memory
§ 19:18 Conclusions
§ 19:19 Areas of scientific disagreement
§ 19:20 — The burden of proof
CHAPTER 20. NEUROIMAGING

I. LEGAL ISSUES

A. BACKGROUND

§ 20:1 Introduction

§ 20:2 Qualification of expert

B. APPLICATIONS IN CIVIL CASES

§ 20:3 Structural damage or major brain imagery

§ 20:4 Existence of closed head or minor brain injury

§ 20:5 —qEEG

§ 20:6 —SPECT

§ 20:7 Existence of toxic encephalopathy or chemical sensitivities

§ 20:8 Lie detection in civil cases

C. APPLICATIONS IN CRIMINAL CASES

§ 20:9 Introduction

§ 20:10 Brain injury—Diminished cognitive capacity

§ 20:11 —Behavior or emotional disorders to mitigate penalty

§ 20:12 Corroboration or diagnosis of cognitive, emotional, or psychological conditions relevant to mens rea or culpability of the offense

§ 20:13 Insanity defense
§ 20:14 Competence
§ 20:15 Juvenile development
§ 20:16 Lie detection and memory
§ 20:17 Death cases

II. SCIENTIFIC ISSUES

A. BACKGROUND

§ 20:18 Introduction
§ 20:19 The brain—Neurons and glia
§ 20:20 —Macrostructure and gross functional neuroanatomy
§ 20:21 Authoritative sources
§ 20:22 —Seminal texts
§ 20:23 —Peer-reviewed journals

B. NEUROIMAGING TECHNIQUES

1. Introduction
§ 20:24 Generally

2. Magnetic Resonance Imaging (MRI) Techniques
§ 20:25 MRI general overview
§ 20:26 Anatomical (or structural) MRI
§ 20:27 Diffusion tensor imaging
§ 20:28 Functional MRI
§ 20:29 Image acquisition—Challenges
§ 20:30 —Uncertainty regarding the hemodynamic signal
§ 20:31 —Signal and noise
§ 20:32 —Spatial resolution
§ 20:33 —Temporal resolution
§ 20:34 Experimental design for functional MRI
§ 20:35 —Types of functional imaging studies—Activation studies
§ 20:36 ——Imaging of the resting state
§ 20:37 ——Task design—Functional decomposition and experimental design
§ 20:38 ——Task types
§ 20:39 ——Design types
§ 20:40 ——Behavioral checks
§ 20:41 —Inferring function: Forward and reverse inference
§ 20:42 Data analysis for functional MRI
§ 20:43 —Averaging data
§ 20:44 —Between-subject or across-subject studies
§ 20:45 —Movement, smoothing, and normalizing
§ 20:46 —Comparisons
3. Other Neuroimaging Methods

§ 20:50 Computerized Axial Tomography (CT)
§ 20:51 Positron Emission Tomography (PET)
§ 20:52 Single Photon Emission Computed Tomography (SPECT)
§ 20:53 Electroencephalography (EEG) and Magnetoencephalography (MEG)
§ 20:54 Optical imaging techniques

4. Other Neuroscientific Techniques
   a. Introduction

§ 20:55 Generally
   b. Classical Neuroanatomical and Neurophysiological Techniques

§ 20:56 Anatomical techniques for visualizing individual neurons
§ 20:57 Electrophysiology
   c. Clinical Diagnostic and Intervention Methods

§ 20:58 Lumbar puncture and cerebrospinal fluid analysis
§ 20:59 Transcranial magnetic stimulation (TMS)
§ 20:60 Deep brain stimulation
§ 20:61 Implanted arrays
   d. Emerging Technologies

§ 20:62 Optogenetics
§ 20:63 Neurogenetics and behavioral genetics

CHAPTER 21. CLINICAL MEDICINE

I. LEGAL ISSUES

§ 21:1 Introduction
§ 21:2 Specific and general causation
§ 21:3 The status of medical testimony
§ 21:4 Areas of agreement and disagreement in differential diagnosis opinions—Areas of agreement
§ 21:5 —Areas of disagreement
§ 21:6 — —Ruling in before ruling out
§ 21:7 — —Ruling out—Temporal order
§ 21:8 —Explaining differences
§ 21:9 Bases for excluding expert testimony
§ 21:10 —Lack of qualifications
§ 21:11 —Frye
§ 21:12 —Rule 702
§ 21:13 —Rule 703
§ 21:14 Conclusion

II. SCIENTIFIC STATUS
§ 21:15 Introduction
§ 21:16 Who practices clinical medicine?
§ 21:17 Medical knowledge—Collective experience and received wisdom
§ 21:18 Medically-related basic research—Toxicology
§ 21:19 —Pharmacology
§ 21:20 —Genetic research
§ 21:21 Human research—Generally
§ 21:22 —Case reports and case series
§ 21:23 —Observational studies
§ 21:24 —Randomized Controlled Clinical Trials (RCT)
§ 21:25 —Multiple studies
§ 21:26 Integrating medical research into practice—Evidence-based medicine
§ 21:27 —Practice guidelines and decision trees
§ 21:28 Clinical decision-making—Introduction to clinical medical practice
§ 21:29 —Patient care
§ 21:30 —Medical research
§ 21:31 Overview of medical diagnosis
§ 21:32 Collecting information—Patient examination and history
§ 21:33 —Record keeping
§ 21:34 —Diagnostic tests
§ 21:35 —Laboratory tests
§ 21:36 —Tissue samples and biopsies
§ 21:37 —Clinical tests
§ 21:38 —Imaging studies
§ 21:39 —Genetic testing
§ 21:40 Diagnosis and differential diagnosis
TABLE OF CONTENTS

§ 21:41     Formulating diagnostic hypotheses
§ 21:42     Hypothesis refinement and verification
§ 21:43     Interpreting diagnostic tests
§ 21:44     Causal reasoning
§ 21:45     Toward a working diagnosis
§ 21:46     Clinical decision-making: treatment and disease management
§ 21:47     Diagnosing an environmental disease—Defining environmental disease
§ 21:48     —Differential diagnosis and differential etiology
§ 21:49     —Generating environmental disease hypotheses
§ 21:50     —Patient history
§ 21:51     —Documenting and quantifying exposure
§ 21:52     —Diagnostic tests
§ 21:53     —Evaluating environmental diagnostic hypotheses
§ 21:54     —Assessing temporal relationships
§ 21:55     —Assessing dose-response
§ 21:56     —Consideration of other causal explanations

Appendix 21A.  Glossary

CHAPTER 22.  TOXICOLOGY

I. LEGAL ISSUES
§ 22:1     Introduction
§ 22:2     Toxicology vs. Epidemiology
§ 22:3     Toxicology and external validity
§ 22:4     —Structure activity and in vitro studies
§ 22:5     —Animal studies
§ 22:6     Mass exposures vs. localized releases
§ 22:7     Cases admitting toxicological evidence to prove causation
§ 22:8     Bases for excluding toxicological evidence
§ 22:9     —Lack of qualifications
§ 22:10    —General acceptance (Frye)
§ 22:11    —Rule 703
§ 22:12    —The Daubert factors
§ 22:13    Fit
§ 22:14    Bases for excluding toxicological evidence—Rule 403
§ 22:15    —Sufficiency
§ 22:16    Conclusion

II. SCIENTIFIC STATUS
§ 22:17    Overview and orientation
§ 22:18    Content of the chapter
§ 22:19    The world of chemicals and chemical exposures
CHAPTER 23. EPIDEMIOLOGY

I. LEGAL ISSUES

§ 23:1 Introduction
§ 23:2 Note: The causal questions and the structure of science
§ 23:3 Population level evidence: General causation—The role of epidemiological evidence in toxic tort cases
§ 23:4 — — — —The absence of epidemiological data
§ 23:5 — — — —The quality and relevance of epidemiological data
§ 23:6 — — — —Study design
§ 23:7 — — — —Number of studies
§ 23:8 — — — —Substance similarity
§ 23:9 — — — —Injury similarity
§ 23:10 — — — —Dosage
§ 23:11 — — — — —Strength of relationship and statistical significance
§ 23:12 — — — — — —Totality of defects
§ 23:13 — — — — — —The importance of statistical significance
§ 23:14 Power
§ 23:15 Population level evidence: General causation—Bases of exclusion
§ 23:16 — — — — — —Lack of qualifications
§ 23:17 — — — — — —The Daubert factors
§ 23:18 — — — — — —Scientific validity
II. GENERAL CONCEPTS IN EPIDEMIOLOGY

§ 23:30 Introduction
§ 23:31 Assessing the capacity of an exposure to cause illness or injury
§ 23:32 Studies that measure illness occurrence in relation to the presence of a given exposure—Comparison of rates across population groups ("correlational" or "ecologic" studies)
§ 23:33 —Randomized controlled trials
§ 23:34 —Nonrandomized studies
§ 23:35 ——Follow-up studies (cohort studies)
§ 23:36 ——Case-control studies
§ 23:37 ——Noncomparability of cases and controls chosen for study ("selection" bias)
§ 23:38 ——Inaccurate characterization of exposures that occurred in cases and controls ("information" bias)
§ 23:39 Quantifying the relation between exposure and disease
§ 23:40 Guidelines for inferring an exposure’s capacity to cause illness
§ 23:41 —Is there an association present between exposure and disease?
§ 23:42 —How strong is the association?
§ 23:43 —Is it clear that the illness, or a forerunner of it, did not give rise to the exposure?
§ 23:44 —Which is more credible, a causal or a noncausal interpretation?
§ 23:45 —Is the size of the association between exposure and disease greatest when one might expect it to be?
§ 23:46 Estimating the likelihood that an exposure capable of causing an illness actually did so in a given exposed individual
§ 23:47 Conclusion

Appendix 23A. Glossary of Terms
CHAPTER 24. ELECTROMAGNETIC FIELDS

I. LEGAL ISSUES

§ 24:1 Generally
§ 24:2 The case law
§ 24:3 —Regulation of siting
§ 24:4 —Loss of property value
§ 24:5 —Personal injury
§ 24:6 Potential admissibility issues
§ 24:7 —General causation
§ 24:8 —Specific causation
§ 24:9 —Fit
§ 24:10 —The primacy of epidemiology?
§ 24:11 Conclusion

II. SCIENTIFIC STATUS

§ 24:12 The scientific questions—Statement of hypothesis
§ 24:13 —Characteristics of electric and magnetic fields
§ 24:14 —Sources of exposure and ways of characterizing exposures
§ 24:15 ——Residential exposures
§ 24:16 ——Occupational exposures
§ 24:17 ——Unique features of EMF
§ 24:18 The scientific methods applied in the research—Training of experts and sources of evidence
§ 24:19 —Epidemiology versus laboratory approaches
§ 24:20 —Challenges in epidemiology
§ 24:21 —Challenges in designing laboratory studies
§ 24:22 Areas of scientific agreement—Studies of residential magnetic field exposures and childhood cancer
§ 24:23 —Studies of occupational EMF and adult leukemia and brain cancer
§ 24:24 —Associations of EMF with other health endpoints
§ 24:25 Areas of scientific disagreement—Conflicts among scientific disciplines: Epidemiology vs. Physics
§ 24:26 —Residential exposures and childhood cancer
§ 24:27 —Occupational cancers and adult cancers—Are job titles useful markers of EMF exposure?
§ 24:28 ——Do jobs with higher exposures have higher risk?
§ 24:29 ——Are there workplace agents other than EMF that are responsible?
§ 24:30 Is the focus on cancer warranted?
§ 24:31 Future directions—Future directions in residential exposure studies?
CHAPTER 25. TOBACCO

I. LEGAL ISSUES

§ 25:1 Generally
§ 25:2 The history of tobacco litigation
§ 25:3 “Third wave” tobacco litigation—Medical cost reimbursement litigation
§ 25:4 —Individual suits
§ 25:5 —Suits by groups and class actions
§ 25:6 —FDA litigation
§ 25:7 —E.P.A. regulation of environmental tobacco smoke
§ 25:8 The admissibility of expert testimony in tobacco litigation—Admissibility of evidence indicating that tobacco causes specific diseases
§ 25:9 —Admissibility of evidence that nicotine is addictive
§ 25:10 —Tobacco as a “second cause”
§ 25:11 —Environmental tobacco smoke testimony
§ 25:12 —Exclusion of defense experts?
§ 25:13 Conclusion

II. SCIENTIFIC STATUS

§ 25:14 The scientific questions—Introduction
§ 25:15 —Recurring terms
§ 25:16 —The scientific methods applied in the research
§ 25:17 ——Animal laboratory experiments
§ 25:18 ——Clinical experiments
§ 25:19 ——Autopsy studies
§ 25:20 ——Epidemiological studies
§ 25:21 —Combining results
§ 25:22 —Nicotine addiction
§ 25:23 —Health effects of active cigarette smoking—Cardiovascular diseases
§ 25:24 ———Coronary heart disease
§ 25:25 ———Stroke
§ 25:26 ———Hypertension
§ 25:27 ———Atherosclerotic peripheral vascular disease
§ 25:28 ———Aortic aneurysm

CHAPTER 29. THE GENERAL
ASSUMPTIONS AND RATIONALE OF
FORENSIC IDENTIFICATION

I. LEGAL ISSUES
§ 29:1 Generally
§ 29:2 Application and Impact of Admissibility Rules
§ 29:3 The NRC Report
§ 29:4 —The Forensic Science Committee
§ 29:5 —Findings and conclusions—Lack of scientific rigor
  in many forensic sciences
MODERN SCIENTIFIC EVIDENCE

§ 29:6 ——Failure of existing Institutions
§ 29:7 ——Recommendations
§ 29:8 ——Implications for courts
§ 29:9 The NRC report—Aftermath
§ 29:10 Cases citing NRC report
§ 29:11 The PCAST Report
§ 29:12 PCAST Report: Scientific Criteria for Validity and Reliability of Forensic Feature-Comparison Methods
§ 29:13 PCAST Report: Evaluation of Scientific Validity for Seven Feature-Comparison Methods
§ 29:14 PCAST Report: Recommendations to Science-Based Agencies, the FBI Laboratory, and the Attorney General of the United States
§ 29:15 PCAST Report: Recommendations to the Judiciary
§ 29:16 The Confrontation Clause and the right of cross-examination

II. SCIENTIFIC ISSUES—INTRODUCTION

§ 29:17 Generally
§ 29:18 What makes something “forensic?”
§ 29:19 What is expected of the forensic sciences?
§ 29:20 Subordination of “scientific truth” to “legal truth”
§ 29:21 Scientific evidence effects on criminal justice

III. COMPARISON

§ 29:22 Generally
§ 29:23 Class and individual characteristics
§ 29:24 Features
§ 29:25 Feature independence

IV. IDENTIFICATION AND INDIVIDUALIZATION

§ 29:26 Generally
§ 29:27 Identification processes v. comparison processes
§ 29:28 Explicable differences

V. EVALUATION OF SOURCE

§ 29:29 Generally
§ 29:30 “Same as that” vs. “born of that”
§ 29:31 Uniqueness

VI. SCIENCE AND THE SCIENTIFIC METHOD

§ 29:32 Generally
§ 29:33 Science
§ 29:34 Scientific method

lvi
§ 29:35 Induction and deduction
§ 29:36 Failure of the forensic sciences to consistently appreciate the implications of the scientific method
§ 29:37 Substitution of intuition or experience for defensible scientific fact
§ 29:38 Legal skepticism concerning case-oriented research

VII. STANDARDS OF OPERATION, STANDARDS OF PERFORMANCE
§ 29:39 Generally
§ 29:40 Reliability, validity, precision, and accuracy
§ 29:41 Expression of certainty of opinions
§ 29:42 The mismeasure of evidence
§ 29:43 Proficiency testing as a means of ensuring quality in technical procedures
§ 29:44 Signal detection theory and proficiency testing

VIII. ISSUES OF PROFESSIONAL PRACTICE
§ 29:45 Documentation of findings
§ 29:46 Statistical basis for evidence evaluation
§ 29:47 Personal bias in observation and interpretation
§ 29:48 Physical evidence is not the property of one side or the other

IX. SUBJECTIVE TESTS VS. OBJECTIVE TESTS
§ 29:49 Generally

X. VULNERABILITY OF PHYSICAL EVIDENCE CATEGORIES IN LIGHT OF DAUBERT CRITERIA
§ 29:50 Daubert criteria
§ 29:51 Forensic identification subspecialties—Blood and other physiological fluids
§ 29:52 —Glass
§ 29:53 —Hair evidence
§ 29:54 —Fiber evidence
§ 29:55 —Paint evidence
§ 29:56 —Fingerprint evidence
§ 29:57 —Soil and mineral evidence
§ 29:58 —Handwriting
§ 29:59 —Narcotics and drugs of abuse
§ 29:60 —Voiceprints
§ 29:61 —Bitemarks
§ 29:62 —Arson and fire evidence
§ 29:63 —Toolmark and firearms evidence
CHAPTER 30. DNA TYPING

I. LEGAL ISSUES

§ 30:1 Introduction to basic principles
§ 30:2 Introduction to the scientific terminology and taxonomy of typing systems
§ 30:3 Introduction to population genetics
§ 30:4 CODIS
§ 30:5 Authoritative texts
§ 30:6 Historical objections to DNA admissibility—Introduction
§ 30:7 —Science
§ 30:8 —Population genetics
§ 30:9 —Lab and analyst error
§ 30:10 Current objections to DNA admissibility—Introduction
§ 30:11 —Science—General subjectivity
§ 30:12 —Mixtures
§ 30:13 —Transfer
§ 30:14 —Preservation of evidence
§ 30:15 —Prominent scandals
§ 30:16 —Expert qualifications
§ 30:17 —Quality assurance and proficiency testing
§ 30:18 —Population genetics—Incorporating error rates in the calculation of probabilities
§ 30:19 —Sub-population frequencies
§ 30:20 —Cold hits and the database match probability
§ 30:21 —Introduction of evidence of database search
§ 30:22 —Presentation of statistical evidence—Generally
§ 30:23 —Use of non-quantitative language
§ 30:24 —Common mistakes and fallacies
§ 30:25 —Likelihood ratios and Bayesian analysis
§ 30:26 Access to evidence—Discovery and access to experts
§ 30:27 —Pretrial retesting
§ 30:28 —Defense access to databases
§ 30:29 Special topics—Introduction
§ 30:30 —Y-STR typing
§ 30:31 —Mitochondrial DNA (MtDNA)
§ 30:32 —Low copy number typing
CHAPTER 31. PARENTAGE TESTING

I. LEGAL ISSUES

§ 31:1 Introduction
§ 31:2 The movement toward admissibility
§ 31:3 Current tests
§ 31:4 Weight and impact of scientific tests of parentage
§ 31:5 Disestablishing parentage
§ 31:6 Conflicting indicia of parentage
§ 31:7 The “paternity index” and the “probability of paternity”
§ 31:8 The Uniform Parentage Act
§ 31:9 Criminal cases

II. SCIENTIFIC STATUS

§ 31:10 Introduction
§ 31:11 Genetic markers used in parentage testing
§ 31:12 Genetic principles of paternity testing
§ 31:13 Selection of genetic tests
§ 31:14 Evaluation of the significance of a paternity match
§ 31:15 Principles and assumptions underlying W—General principles and assumptions
§ 31:16 —The product rule
§ 31:17 Differences between disputed paternity and disputed identity
§ 31:18 —Technical differences
§ 31:19 —Genetic differences
§ 31:20 —Computational differences
§ 31:21 Conclusion

CHAPTER 32. FINGERPRINT IDENTIFICATION

I. LEGAL ISSUES

§ 32:1 Generally
§ 32:2 Admissibility prior to Daubert
§ 32:3 Post-Daubert challenges in federal courts
§ 32:4 Post-Daubert challenges in federal courts—Refusal to conduct a Daubert hearing
§ 32:5 —Reversal of the burden of persuasion
§ 32:6 Post-Daubert challenges in federal courts—Ignoring Kumho Tire’s task-at-hand requirement
§ 32:7 —Avoidance of actual Daubert analysis
§ 32:8 —Turning Kumho Tire on its head
§ 32:9 —Reliance on admission by other courts
§ 32:10 —Reliance on general acceptance
§ 32:11 —Emphasis on flexibility of criteria
§ 32:12 —Bringing the standards down to meet the expertise
§ 32:13 —Relegate to weight, not admissibility
§ 32:14 —A short-lived exception to the usual evasions: United States v. Llera Plaza
TABLE OF CONTENTS

§ 32:15 — A short-lived exception to the usual evasions—
*Llera-Plaza I*
§ 32:16 —— *Llera-Plaza II*
§ 32:17 —— Implications
§ 32:18 —— Developments after *Llera Plaza*
§ 32:19 Post-*Daubert* challenges in state courts
§ 32:20 Legal Responses after the NRC/NAS report on
strengthening forensic sciences in the United States
§ 32:21 Erroneous identifications

II. SCIENTIFIC STATUS

§ 32:22 Introductory discussion of the science—The scientific
questions
§ 32:23 —— Specificity, constancy and reliability
§ 32:24 —— Value of fingerprints other than for identification
§ 32:25 —— Time of deposition of the fingermarks
§ 32:26 —— Fingermark development
§ 32:27 —— Storage and retrieval of records
§ 32:28 —— The scientific methods applied in the research
§ 32:29 —— Fingerprint recording and processing
§ 32:30 —— Fingerprint filing and record retrieval
§ 32:31 —— Fingerprint examination, comparison and
interpretation—Examination of fingerprints
§ 32:32 —— —— Comparison of fingermarks against prints
§ 32:33 —— —— Interpretation of fingerprint comparisons
§ 32:34 —— —— The generalized case for identification
§ 32:35 —— —— Counting minutiae or points of comparison
§ 32:36 —— —— Statistical bases
§ 32:37 —— —— Professional rejection of qualified identifications
§ 32:38 —— —— Uses other than for identification
§ 32:39 —— —— Documentation of fingerprint examinations
§ 32:40 Areas of scientific agreement
§ 32:41 —— Constancy of patterns
§ 32:42 —— Sufficiency of identifying details
§ 32:43 —— Storage and retrieval
§ 32:44 —— Crime scene marks
§ 32:45 —— Identification and interpretation
§ 32:46 —— Training, experience and ability of fingerprint
examiners
§ 32:47 Areas of scientific disagreement—The question of
standards and the basis for concluding an
identification—Criteria range from self-evident to
subjective and untested
§ 32:48 —— —— The absence of suitable measurements creates
vague and flexible criteria
§ 32:49 —— Questions of standard practices, proficiency testing,
self-regulation and empirical validation
CHAPTER 33. HANDWRITING IDENTIFICATION

I. LEGAL ISSUES

A. BACKGROUND

§ 33:1 Introduction
§ 33:2 Early legal history
§ 33:3 Admissibility in the United States
§ 33:4 Counter-testimony on forensic document examiners’ claimed skills
§ 33:5 Law review literature

B. THE SUPREME COURT’S JURISPRUDENCE ON EXPERT RELIABILITY

§ 33:6 The “Daubert Trilogy”
§ 33:7 The Trouble with Daubert
§ 33:8 The Trouble with General Electric v. Joiner
§ 33:9 Kumho Tire v. Carmichael

Appendix to Part I. Compilation of Handwriting Identification Reliability Cases from Daubert to Kumho Tire and Beyond

II. SCIENTIFIC STATUS

§ 33:10 Introduction
§ 33:11 Areas of agreement: The possibility of a science of handwriting identification
§ 33:12 —Proposed principles of handwriting identification
§ 33:13 —A summary of handwriting identification practice
§ 33:14 Areas of disagreement: Testing document examiner
CHAPTER 34. FIREARMS AND TOOLMARK IDENTIFICATION

I. LEGAL ISSUES

§ 34:1 Generally
§ 34:2 Toolmark identification
§ 34:3 Firearms examination
§ 34:4 Post-Daubert decisions
§ 34:5 Current developments in caselaw
§ 34:6 Conclusion

II. SCIENTIFIC ISSUES
§ 34:7 Introductory discussion of the science
§ 34:8 —The scientific questions
§ 34:9 —The scientific methods applied in firearms and toolmark examination
§ 34:10 Areas of scientific agreement
§ 34:11 Areas of scientific disagreement—Disagreement about the scientific foundations
§ 34:12 —Disagreement among practitioners in particular applications
§ 34:13 Development of objective criteria for identification
§ 34:14 Future directions

Appendix 34A. Glossary of Terms
Appendix 34B. Questions Designed to Test a Witness’s Ability to Identify Striated Toolmarks
Appendix 34C. National Research Council Comments

CHAPTER 35. IDENTIFICATION FROM BITEMARKS

I. LEGAL ISSUES
§ 35:1 Generally
§ 35:2 Bitemark identification and the Daubert factors
§ 35:3 Divergence of opinions by bitemark experts
§ 35:4 The judicial response to expert testimony on bitemark identification
§ 35:5 —Cases before Daubert
§ 35:6 —Cases after Daubert
§ 35:7 Erroneous identification and conviction

II. SCIENTIFIC ISSUES
§ 35:8 Introductory discussion of the scientific status of bitemark comparisons
§ 35:9 —Areas of dental testimony
§ 35:10 —Training and professional forensic organizations
§ 35:11 —NRC Report
§ 35:12 Recognition and analysis of human bitemarks
§ 35:13 —Proficiency testing of board certified odontologists
§ 35:14 Scientific methods applied to comparison techniques
§ 35:15 —Analysis of suspect teeth: the conundrum of multiple methods
§ 35:16 —Analysis of a bitemark pattern
### Table of Contents

- § 35:17 The scientific limitations of bitemark testimony
- § 35:18 The accuracy of skin as a substrate for bitemarks
- § 35:19 Bruising and other considerations
- § 35:20 The issue of individuality of human dentition
- § 35:21 Scientific literature on bitemark identification
- § 35:22 The accuracy of skin as a record of bitemarks
- § 35:23 Uniqueness of the human dentition
- § 35:24 Analytical techniques
- § 35:25 Technical advancements
- § 35:26 Digital analysis
- § 35:27 DNA and bitemark analysis
- § 35:28 Casework involving both DNA and bitemark evidence
- § 35:29 Areas of scientific agreement
- § 35:30 Evidence collection
- § 35:31 From the victim
- § 35:32 From the suspect
- § 35:33 Analysis and comparison of bitemarks
- § 35:34 Areas of scientific disagreement
- § 35:35 Unresolved issues
- § 35:36 Future directions

Appendix 35A. ABFO Bitemark Methodology Guidelines
Appendix 35B. Evidence Collection of Suspected Dentition
Appendix 35C. Methods of Comparing Exemplars to Bitemarks
Appendix 35D. ABFO Scoring Sheet for Bite Mark Analysis
Appendix 35E. National Research Council Comments
Appendix 35F. Amici Curiae Brief Submitted in In re Richards, 371 P. 3d 195 (2016)

Table of Laws and Rules
Table of Cases
Index

**Volume 5**

**CHAPTER 36. TALKER IDENTIFICATION**

**I. LEGAL ISSUES**

- § 36:1 Pre-Daubert decisions
- § 36:2 State decisions post-Daubert
- § 36:3 Federal decisions post-Daubert
II. SCIENTIFIC STATUS

§ 36:4 Introductory discussion of the science—The scientific questions—Terminology and basic concepts
§ 36:5 — — — Instrumentation and display
§ 36:6 — — — Decision objectives
§ 36:7 — — — Acoustic characteristics
§ 36:8 — — — A model of talker identification variables
§ 36:9 — Scientific methods applied in talker identification research
§ 36:10 — — Variations in methods
§ 36:11 — — Quantity of sound studied
§ 36:12 — — Sampling of talkers
§ 36:13 — — Differences between scientific research and forensic application
§ 36:14 — — — Decision categories
§ 36:15 — — — Visual vs. visual-aural identification
§ 36:16 — — — Quality of speech samples and authenticity of recordings
§ 36:17 — — — Selection of talkers for identification task
§ 36:18 Areas of scientific agreement
§ 36:19 — Signal transmission and recording
§ 36:20 — Phonetic context and duration
§ 36:21 — Disguises and mimicking
§ 36:22 — Psychological or physical state of the talker
§ 36:23 — Earwitness testimony
§ 36:24 — Summary
§ 36:25 Areas of scientific disagreement
§ 36:26 Future directions
Appendix 36A. Glossary

CHAPTER 37. FIRES, ARSONS, AND EXPLOSIONS

I. LEGAL ISSUES

§ 37:1 Introduction
§ 37:2 A brief history—Daubert, Kumho Tire, and fire investigations
§ 37:3 — Pre-Kumho claims that fire investigators were not subject to Daubert
§ 37:4 — Claims that fire investigation was not “novel”
§ 37:5 Daubert standard—Generally
§ 37:6 — Exhaustiveness of factors
§ 37:7 — Burden of proof
§ 37:8 Daubert admissibility—Scientific foundation of testimony

lxviii
TABLE OF CONTENTS

§ 37:9 — —NFPA 921 as the standard in fire investigation
§ 37:10 — —Examples of careful analyses, both admitting and excluding
§ 37:11 — —Motive testimony
§ 37:12 — —Conflict in the field
§ 37:13 — —Specific theories (many discredited) of cause and origin
§ 37:14 — —Time and cause of death
§ 37:15 — —Controverted facts
§ 37:16 — —Cursory admission and exclusion with little or no examination of scientific foundation
§ 37:17 — —Intersection of “experience” and empirical testing
§ 37:18 — —Experience as foundation for testimony
§ 37:19 — —Substitution of “experience” for methodological rigor
§ 37:20 — —Expert qualifications—Generally
§ 37:21 — —NFPA 1033
§ 37:22 — —Task-at-hand and scope of expertise
§ 37:23 — —Factual basis of expert’s opinions
§ 37:24 — —Selected non-Daubert cases
§ 37:25 — —Special topics—Introduction
§ 37:26 — —Accelerant detecting canines
§ 37:27 — —Common law presumption against arson
§ 37:28 — —Disclosure of expert and reports
§ 37:29 — Access to experts for indigent defendants
§ 37:30 — —Relationship between civil insurance and criminal prosecutions
§ 37:31 — —Need for independent testing
§ 37:32 — —Prejudicial photos or imagery
§ 37:33 — —Destructive device/explosive device standard

II. SCIENTIFIC STATUS

§ 37:34 — —Introductory discussion of the science
§ 37:35 — —Sources—Authoritative publications
§ 37:36 — —Periodical literature
§ 37:37 — —Field investigations
§ 37:38 — —Test burns
§ 37:39 — —Errors in origin determinations
§ 37:40 — —Uncertainty in measurement
§ 37:41 — —Accelerant detecting canines
§ 37:42 — —Sniffers
§ 37:43 — —Visual observation of accelerant pour patterns
§ 37:44 — —Laboratory analysis—Classification of petroleum products
§ 37:45 — —Identification (individualization) of petroleum products
§ 37:46 Areas of scientific agreement and disagreement—
  Field investigations
§ 37:47 — —The behavior of fire
§ 37:48 — —Ventilation controlled fires
§ 37:49 — —The appearance of accelerant induced damage
§ 37:50 — —Accidental fires

**II. SCIENTIFIC STATUS**

**A. THE CASE FOR POLYGRAPH TESTS**

| § 38:20 | Introductory discussion of the science—Background |
| § 38:21 | —Psychophysiological detection of deception techniques—The relevant-irrelevant test (RIT) |
| § 38:22 | ——The control question test (CQT) |
| § 38:23 | ——The Directed Lie Test (DLT) |
| § 38:24 | ——Guilty knowledge tests (GKT) |
| § 38:25 | Areas of scientific agreement and disagreement—Survey of the accuracy of polygraph tests |
| § 38:26 | —Laboratory studies—Control question test |
| § 38:27 | ——Directed-lie test |
| § 38:28 | Areas of scientific agreement and disagreement—Survey of the accuracy of polygraph tests—Laboratory studies—Guilty knowledge test |
| § 38:29 | —Field studies |
| § 38:30 | Areas of scientific agreement and disagreement—Survey of the accuracy of polygraph tests—Field studies—Control question test |
| § 38:31 | ——Directed-lie test |
| § 38:32 | ——Guilty knowledge test |
| § 38:33 | Areas of scientific agreement and disagreement—Countermeasures |
| § 38:34 | ——Countermeasures and the CQT |
| § 38:35 | ——Countermeasures and the GKT |
| § 38:36 | —The polygraph in practice—Application of comparison question tests |
| § 38:37 | ——Application of the guilty knowledge test |
| § 38:38 | —General acceptance of polygraph testing by the scientific community |
| § 38:39 | Major developments and future prospects |
| § 38:40 | Misconceptions about control (comparison) questions |
| § 38:41 | —Inconsistency, selectivity, and misrepresentations |
B. THE CASE AGAINST POLYGRAPH TESTS

§ 38:45 Introductory discussion of the science
§ 38:46 — Background—Instrumentation
§ 38:47 — —The control question technique (CQT)
§ 38:48 — — — Theory of the CQT
§ 38:49 — — — Scoring the CQT
§ 38:50 — — — The “Stimulation” test
§ 38:51 — — — The directed lie test (DLT): A variant of the CQT
§ 38:52 — —The scientific questions and methods—What branch of science is relevant to the evaluation of CQT theory and application?
§ 38:53 — — — Is the CQT a test?
§ 38:54 — — — Does the CQT produce consistent (reliable) results?
§ 38:55 — — — Is CQT theory scientifically sound?
§ 38:56 — — — Can CQT theory be tested?
§ 38:57 — — — What scientific standards must a study satisfy to provide a meaningful appraisal of CQT accuracy?
§ 38:58 — — — Is the CQT accurate (valid)?
§ 38:59 — — — Can guilty persons be trained to use “countermeasures” to defeat a CQT?
§ 38:60 — — — Has the computerization of the CQT improved its accuracy?
§ 38:61 — — — Why do law enforcement agencies use the CQT?
§ 38:62 — — — What is the prevailing scientific opinion about CQT theory and testing?
§ 38:63 — — — Is polygraph screening of federal employees and job applicants scientifically justified?
§ 38:64 — — — Is there an accurate psychophysiological test for identifying criminals?
§ 38:65 Areas of scientific agreement and disagreement—The relevant scientific community—Scientists at arms length
§ 38:66 — — Polygraph examiners are not scientists
§ 38:67 — — Why the CQT is not a test—Question construction and administration are not standardized
§ 38:68 — — Subjectivity of chart interpretation
§ 38:69 — — Absence of controlling standards
§ 38:70 — — The CQT has unknown reliability—Inter-scorer agreement
§ 38:71 — — Test-retest agreement
Guilty Knowledge Test (GKT)

§ 38:108 — —Rationale behind the traditional GKT
§ 38:109 — —Measuring brainwaves with the GKT: “Brain fingerprinting”
§ 38:110 — —Evidence supporting GKT accuracy
§ 38:111 — — —Traditional GKT
§ 38:112 — — —ERP-GKT
§ 38:113 — —Scientific opinion
§ 38:114 —Polygraph screening of federal employees and job applicants—National security screening
§ 38:115 — —Opinions of DOE national laboratory senior scientists regarding employee screening
§ 38:116 Summary of areas of agreement: Topics for future research
§ 38:117 —The future of the “lie detector”
§ 38:118 —The future of the guilty knowledge test
§ 38:119 —To accept the pro-polygraph arguments, one must believe...

CHAPTER 39. ALCOHOL TESTING

I. LEGAL ISSUES

§ 39:1 Introduction
§ 39:2 Validity of the underlying theory or principle
§ 39:3 —Novel scientific evidence
§ 39:4 —Tests for biomarkers
§ 39:5 —Alcohol monitoring bracelets
§ 39:6 —Chemical, biochemical, and gas chromatography tests
§ 39:7 —Time of testing
§ 39:8 —Breath tests
§ 39:9 —Horizontal Gaze Nystagmus (HGN)—Validity/general acceptance
§ 39:10 — —Fit
§ 39:11 — —Field sobriety tests
§ 39:12 General technique
§ 39:13 —Procedures mandated by statute
§ 39:14 —Source code
§ 39:15 —Chain of custody
§ 39:16 Confrontation clause
§ 39:17 Specific technique
§ 39:18 Conclusion

II. SCIENTIFIC STATUS

§ 39:19 Introduction
§ 39:20 Pharmacology and toxicology of ethyl alcohol

lxxiv
§ 39:21 — Interpretation of alcohol concentrations
§ 39:22 — Effects of alcohol on the central nervous system
§ 39:23 — — Impairment of specific functions related to driving ability—Vision
§ 39:24 — — — Auditory discrimination
§ 39:25 — — — Other sensory effects
§ 39:26 — — — Reaction time
§ 39:27 — — Alcohol impairment of driving/piloting skills—Motor vehicle
§ 39:28 — — — Aviation
§ 39:29 — Effects of alcohol in combination with other drugs—Depressants
§ 39:30 — — Stimulants
§ 39:31 — — Other drugs
§ 39:32 Alcohol testing procedures—Blood and body fluids
§ 39:33 — — Chemical methods
§ 39:34 — — Biochemical methods
§ 39:35 — — Conversion of serum/plasma ethanol to whole blood

§ 39:37 — — — Direct injection techniques
§ 39:38 — — — Headspace techniques
§ 39:39 — — Breath testing—Methods for breath analysis
§ 39:40 — — Sampling breath for alcohol analysis
§ 39:41 — — — Residual mouth alcohol
§ 39:42 — — — Condensation losses
§ 39:43 — — Blood and breath relationships
§ 39:44 — — Breath alcohol testing instrumentation
§ 39:45 — — — Passive Alcohol Sensor (PAS)
§ 39:46 — — — Screening device
§ 39:47 — — — Evidential breath tester
§ 39:48 — — Potential challenges to breath test results
§ 39:49 — — — Specificity
§ 39:50 — — — Failure to follow required procedure and documentation
§ 39:51 — — — Residual mouth alcohol
§ 39:52 — — — Instrument variability
§ 39:53 — — Detection technology and instruments—Infrared spectrophotometry
§ 39:54 — — — Electrochemical oxidation/fuel cell
§ 39:55 — — — Chemical oxidation/photometry
§ 39:56 Interpretation of alcohol results in biological specimens
§ 39:57 — Analytical considerations
§ 39:58 — Distribution of alcohol in the body
§ 39:59 — — Blood
§ 39:60 — — Other body tissues
CHAPTER 40. DRUG TESTING

I. LEGAL ISSUES

§ 40:1 Introduction
§ 40:2 Validity of the underlying theory or principle
§ 40:3 —Hair
§ 40:4 —Preliminary drug tests
§ 40:5 —Other drug tests
§ 40:6 —Timing
§ 40:7 —Horizontal Gaze Nystagmus (HGN) and Drug Recognition Evaluation (DRE) protocol—Validity/general acceptance
§ 40:8 ———Nystagmus
§ 40:9 ———DRE protocol
§ 40:10 ——Fit
§ 40:11 General technique
§ 40:12 —EMIT and other preliminary tests
§ 40:13 —Chain of custody
§ 40:14 —Procedures mandated by statute
§ 40:15 Confrontation clause
§ 40:16 Specific technique
§ 40:17 Conclusion

II. SCIENTIFIC STATUS

§ 40:18 Introductory discussion of the science
§ 40:19 —Strengths and limitations of self-reported data
§ 40:20 —Strengths and limitations of chemical testing data
§ 40:21 Drug use survey findings for selected populations
§ 40:22 —High school senior surveys
§ 40:23 —National household surveys on drug abuse
§ 40:24 —Military worldwide surveys
§ 40:25 —Jail and prison inmate surveys
CHAPTER 42. ACCIDENT RECONSTRUCTION

§ 42:1 Introduction
§ 42:2 Historical background
§ 42:3 Qualifications—Generally
§ 42:4 —Background
§ 42:5 —Police officers
§ 42:6 —General versus specific expertise
§ 42:7 —Publication record
§ 42:8 Relevance
§ 42:9 Reliability—Generally
§ 42:10 —Daubert factors—Falsifiability/testing
§ 42:11 —Daubert Factors—Peer review/general acceptance
§ 42:12 —Basis
§ 42:13 —Assumptions and uncertainty
§ 42:14 Re-creations and other visual devices
§ 42:15 Conclusion

CHAPTER 43. ECONOMIC AND FINANCIAL EXPERTISE AND ECONOMIC DAMAGES

I. LEGAL ISSUES

§ 43:1 Introduction
§ 43:2 Qualifications of the economic or financial expert
§ 43:3 Subjects of economic and financial testimony
§ 43:4 Flaws in economic and financial analysis
§ 43:5 —Incorrect input information or faulty factual assumptions
§ 43:6 —Inadequate supporting data
§ 43:7 —Lack of familiarity with underlying data
Table of Contents

§ 43:8 — Untestable models and other methodological problems
§ 43:9 — Estimating damages in patent infringement
§ 43:10 — Results-oriented analysis
§ 43:11 Conclusion

II. SCIENTIFIC ISSUES: INTRODUCTION TO ECONOMIC DAMAGES ANALYSIS

§ 43:12 Proving economic losses
§ 43:13 Qualifications of the expert
§ 43:14 Damage causation
§ 43:15 — Causation for antitrust damages
§ 43:16 — Causation and mitigation in contract cases
§ 43:17 — Causation in intellectual property litigation
§ 43:18 — Accounting for other contributing factors
§ 43:19 Assuming causation

III. THE SCIENCE UNDERLYING MOST BUSINESS DAMAGES

§ 43:20 Financial theory of the firm
§ 43:21 Concept of present value
§ 43:22 Discounted cash flow valuation
§ 43:23 Equity valuation versus firm valuation
§ 43:24 Definition of cash flows
§ 43:25 Discount rates
§ 43:26 A shortcut method of valuing the firm—The capitalization of earnings
§ 43:27 Damages and valuation

IV. THE MEASURE OF DAMAGES

§ 43:28 Generally
§ 43:29 Business damage measures
§ 43:30 Damage measures in class actions
§ 43:31 Personal damage measures
§ 43:32 Mitigation of damages

V. DAMAGES IN ANTITRUST CASES

§ 43:33 Damages in non-class antitrust cases
§ 43:34 Damage calculations in class action antitrust cases
§ 43:35 — Benchmarks used to calculate class damages
§ 43:36 — Calculating damages without competitive benchmarks
§ 43:37 — Damages in indirect purchaser class actions

VI. PATENT INFRINGEMENT DAMAGES
§ 43:38 Introduction
§ 43:39 Legal framework
§ 43:40 Lost profit damages—Panduit test
§ 43:41 Calculating lost profit damages
§ 43:42 Price erosion damages
§ 43:43 Lost sales
§ 43:44 Lost profits
§ 43:45 Reasonable royalty

VII. ISSUES AND AREAS OF DISAGREEMENT IN BUSINESS DAMAGES

§ 43:46 Introduction
§ 43:47 Differences about causation
§ 43:48 Differences about lost sales
§ 43:49 Differences about costs and profits associated with lost sales
§ 43:50 Differences about the value of the plaintiff firm

VIII. SECURITIES LITIGATION DAMAGES

§ 43:51 Introduction to class action securities litigation
§ 43:52 Rule 10b-5
§ 43:53 Damage models—Aggregate economic damages
§ 43:54 Event study analysis
§ 43:55 Background of the fraud on the market theory
§ 43:56 Efficient market hypothesis
§ 43:57 Event study methodology
§ 43:58 Issues and areas of disagreement in securities damages—Disagreement about how and when fraudulent information is revealed
§ 43:59 Disagreement about the index used to separate non-fraudulent market effects
§ 43:60 Disagreement about the number of shares traded that suffered damages
§ 43:61 Disagreement about the price inflation “ribbon”
§ 43:62 Disagreement about how adverse information affects the market
§ 43:63 Disagreement about how to take proper account of turnover of the securities

IX. PERSONAL DAMAGES

§ 43:64 Introduction
§ 43:65 Wrongful death
§ 43:66 The measure of damages in wrongful death cases
§ 43:67 Work life expectancy
§ 43:68 Probability of life (L)
CHAPTER 44. ECONOMIC EXPERTS IN ANTITRUST CASES

I. THE LEGAL RELEVANCE OF ECONOMIC ANALYSIS

§ 44:1 Generally
§ 44:2 Exclusion or summary judgment
§ 44:3 Novelty and testability

II. EXCLUSION OF ANTITRUST ECONOMISTS’ TESTIMONY UNDER DAUBERT

§ 44:4 Generally
§ 44:5 Daubert and Economic Science
§ 44:6 Price-fixing
§ 44:7 Monopolization
§ 44:8 Damages

III. ADMISSIBLE TESTIMONY—SUMMARY JUDGMENT
§ 44:9 Generally
§ 44:10 Predatory pricing
§ 44:11 Measurement of relevant markets
§ 44:12 Proof of agreement
§ 44:13 Expert testimony and disaggregation: Linking damages to the violation

IV. CONCLUSION

§ 44:14 Generally
